	Priorities List based on the CIA recommendation of 7 October and approved by ICRS at the 8 October meeting.	
25X1A	8. A handout of the usable coverage of South China priority targets since  1 January 1968, compiled by the ICRS Staff, was distributed to the members. At Mr.  equest a similar recap of North Korea COMIREX targets for this same time	
25X1A	period will be compiled and disseminated to the members.	
25X1A	9. inquired if these requirements would interfere with the intelligence requirements. The Chairman replied that if they were placed at a priority level below the primary intelligence collection requirements on the "J" Mission Priorities Paper there should be no interference. However, other factors are also involved and should be considered.	
25X1A 25X1A	10. requested that NPIC be tasked to provide the latest acceptable  KH-4 coverage of the target list. The NPIC representative was asked  to provide this data.	
25X1A 25X1A 25X1A	recommended that NPIC include the extent and quality of the targets in the feedback report to ICRS.	
25X1A	requested that the ICRS Staff check for duplication between the and the approved ICRS list. 25X	1A
25X1A	13. DIA questioned why the requirement could not be met with aircraft resources.  14. The requirements were accepted for 1105 programming and the Chairman will report further the answers for questions on these targets by the time the priorities paper is considered.	
	A.I.D. REQUIREMENT	
25X1A	15. rewiewed a request received from A. I. D. to support certain crop production studies with KH-4 photography. The members requested additional 25X information such as seasonal requirements, minimum cloud-free photography required,	1A

	etc. This information will be provided the members at a later date.	
	1105 PROGRAMMING REQUIREMENTS	
	16. The Chairman opened the discussion by recommending that consideration be given to use the WAG numbering system in lieu of assigning COMIREX numbers to each WAG used to identify specific areas required for search.	
25X 25X	Areas with WAG identifier. stated that this was being accomplished by NPIC on North Vietnam and if deemed necessary it would appear that the same requirement could be levied through EXSUBCOM on WAG areas. He pointed out that all COMIREX targets would continue to be reported as in the past. NPIC prefers the use of some standard identifier rather than a fictional number presently assigned.	:5X1A
25X	recommended that the Chairman, DBWG, be contacted since he also is involved in WAG reporting in their area coverage files. replied that any proposals will be coordinated with pertinent COMIREX subcommittees and working groups.	
25X	However, he requested that present flexibility for inputting requirements i.e. by geographic boundaries, COMIREX number, or other means be retained. The Chairman assured him this would be the case but that those boundaries can be converted to WAG areas which offers a more definitive method of defining search areas of irregular shape than does the corner coordinate system.	
25X	Stated that he would schedule a presentation from the OSP/CIA CORONA Programming Office for next week to familiarize the members with how the WAG areas are handled in the CORONA Programming as well as the AMS plans for reporting area coverage.	
	21. The targets for 1105 programming are listed in attachment number 1. Those targets that are color requirements only are listed separately.
